

TECHNOLOGY • SECURITY SOLUTIONS

Langston University Student Success Center
Langston, OK

PROJECT DESCRIPTION

CRUX worked with Selser Schaefer Architects to design renovations to the Langston University Success Center. The renovation includes a new lounge, study, dining area, kitchen, and e-gaming center. This aspirational design offers a place of gathering and collaboration. The space has been fully transformed to serve the students, staff, and community.

The CRUX team designed the audio/visual systems to work well with the facility's existing design. We coordinated closely with our design partners to ensure that every piece of equipment performed as expected. It was important to the owner that the new solutions integrated seamlessly with the current equipment.
