

Oklahoma Visitor Centers

PROJECT DESCRIPTION

CRUX Solutions worked with Selser Schaefer Architects to bring these information centers back to life. We created a welcoming experience for each and every Oklahoma visitor. These facilities serve, entertain, and educate at every corner while bringing comfort and accessibility. Each center has a map of Oklahoma for guests to learn about different areas. The Oklahoma Tourism Information Centers are ready to welcome you!

The State of Oklahoma had received federal COVID-19 relief funds. However, because these funds were expiring soon, CRUX Solutions needed to assess and survey each of the nine locations within a week to complete the facility before the funds expired. We designed new structured cabling systems and upgraded video surveillance systems for each of the facilities to improve the safety of staff and guests alike. We also designed touchless door access to reduce the amount of germ spreading as COVID-19 was still impacting the community.

LOW VOLTAGE DESIGN SCOPE

- Network Infrastructure
- Video Surveillance
- Audio/Visual Systems
- Touchless Door Access Control

SIZE: Nine locations

CONSTRUCTION COST: \$20,000,000

COMPLETION DATE: January 2021

ARCHITECT: Selser Schaefer Architects

OWNER: State of Oklahoma
